Let's Start!

Mind the gap!

Learning Outcome

Describe routines and regular activities in a wider range of social and work contexts.

Ask your partner:

- In general, do you think women earn less money than men? Why or why not?
- In what fields does this happen?

Can Do Statements

- I can talk about jobs and work.
- I can talk about experiences that I have and haven't had.
- I can talk about what is necessary.

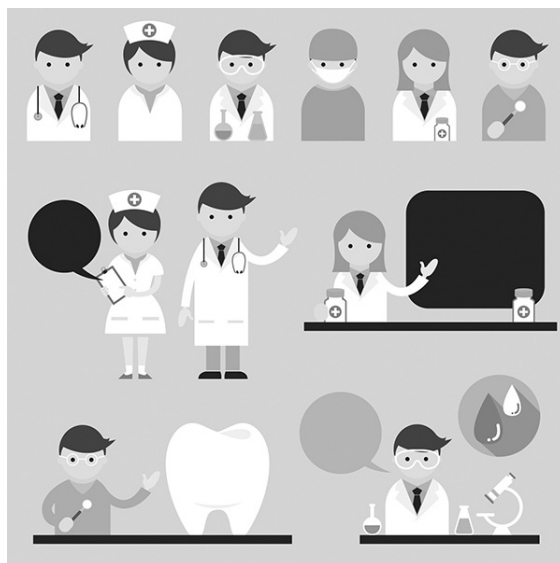

Let's Explore!

In this article, Sally **addresses*** the problem of the wage **gap**** between women and men.

* To "address" something means to discuss it openly.

** The word "gap" means separation or space. In the London subway, you often hear the expression: *Mind the gap*.

Instructions: Read the text aloud.

There is a wage gap between men and women in every field, even the medical profession. A study has shown that female doctors earn an average of \$12,000 less per year than their male counterparts. Women have got to work longer hours to make the same salary as men. This wage gap seems especially unfair because women doctors give better service than men doctors. A survey of 852 patients of the University of Michigan showed that female patients thought women doctors were friendlier and spent more time with them than male doctors. However, male patients did not see a difference. In addition, many scientific studies have found that women doctors spend more time with patients, listen more, and are more caring than male doctors.

Women doctors are going to have to try to reduce the wage gap. Men have got to adapt to new realities. The good thing is that women are now able to enter a profession that has been formally closed to them in the past. And as for the patients – they now have more choice than ever before.

Let's Practice!

What does research say about the wage gap between men and women?

Instructions: Fill in the gaps with words from the list: thought - has found - have found - were - has shown.

A study _____ that female doctors earn an average of \$12,000 less per year than their male counterparts. A survey _____ that female patients _____ women doctors _____ friendlier than male doctors. In addition, many scientific studies _____ that women doctors spend more time with patients.

Let's Practice!

Sally gives her opinion about the wage gap.

Instructions: Fill in the gaps with words from the list: have got to adapt - are going to have to leave - have got to work - are going to have to try.

1. Women _____ longer hours to make the same salary as men.
2. Women doctors _____ to reduce this gap.
3. Men _____ to new realities.
4. Men _____ room for women in every work place.

Extension Activity

Find out more about the wage gap in different professions.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Find a video on the Internet about the wage gap between women and men in different professional fields. Use the key words "wage gap men women" to find one.
- Listen to the video.
- Take down as many notes as you can from the video.
- Try to find out the difference between men's and women's salaries in different professions.
- Present the information to a partner or to the class.

Self-Assessment

Yes

No

I listen to a video on the wage gap.

☐
☐

I take notes about the wage gap.

☐
☐

I present the information.

☐
☐

Target Words

- **wage gap** (noun): the difference in salary between two groups of people
e.g. Almost everywhere, there is a wage gap between men and women.
- **to earn** (verb): to work so that you receive payment
e.g. A study has shown that female doctors earn an average of \$12,000 less per year than men.
- **counterpart** (noun): a person in a different category who has the same job
e.g. Female doctors earn less than their male counterparts.
- **patient** (noun): a person who requires medical treatment
e.g. Female patients thought women doctors were friendlier and spent more time with them than male doctors.
- **scientific** (adjective): based on science
e.g. Many scientific studies have found that women doctors spend more time with patients.
- **unfair** (adjective): not fair; not equal; not correct in principle
e.g. This wage gap seems especially unfair because women doctors give better service than men doctors.

Learning Points

Present Perfect vs. Simple Past Tenses

You use the Present Perfect tense to talk about a finished action or event that is connected to the present in some way.

You use the Simple Past tense to talk about a finished action or event **not** connected to the present.

Present perfect expresses an action that began in the past and has recently been finished or continues into the present. You use time markers like *for*, *since* and *ever* with the Present Perfect.

When you use the past simple, the time is always past. You use time markers with the past like *then*, *ago*, *yesterday*, *when I was ...* with the Simple Past.

To form the Present Perfect tense, you use **have/has** + **the past participle** of the base form of the verb.

Base Form	Past Tense Form	Past Participle	Present Perfect Tense
be	was	been	has been have been
show	showed	shown	has shown have shown
find	found	found	has found have found
prove	proved	proven	has proven have proven

Examples:

- *A study has shown that female doctors earn an average of \$12,000 less per year than their male counterparts.*
- *Scientific studies have found that women doctors spend more time with patients than male doctors.*

Learning Points

Expressing What is Necessary

You can use certain expressions to talk about what is necessary to do in the future in order for something to happen.

- You have to ...
- You have got to ...
- I'm going to have to ...
- You need to ...

Examples:

- *Women have got to work longer hours to make the same salary as men.*
- *Women doctors are going to have to try to reduce this gap.*
