Women's Professional Soccer - A Level Playing Field?

The FIFA Women's World Cup was held here recently, with record-breaking attendance. Tickets for the final game sold out months ago. This is a pattern we've seen since the London Olympics, where another record-setting number of people attended the women's soccer matches. Clearly, more people have become interested in women's soccer and will pay to see the games.

Women's soccer has been described as the fastest-growing sport on the planet. The number of teams competing in the tournaments has increased two-fold. FIFA's broadcasting department has promised the largest coverage online and on TV ever. Even the gaming industry has exploded with new women's soccer video games and products.

Even though all of this progress is being made, inequality and sexism still exist when it comes to salary and sponsorships. Female professional soccer players still earn significantly less than their male counterparts. Sexist ideas such as making the uniforms tighter to attract more audiences still permeate the upper management.

In short, women's professional soccer remains in a precarious position. Until we see a change in attitude both at a management and spectator level, there is still a long way to go to achieve a level playing field.

Let's Practice!

Learning Points

Writing A Short News Article

When writing a short news article, there are a few rules you need to follow.

Write a **headline** for the article that is a short summary of what the article is about. That way, your readers can predict what they are going to read. Keep the headline short and interesting.

You use words that are at a slightly higher level than you would in conversation. Try to use adjectives and adverbs to make your article interesting to read.

You use the **Present Perfect tense** often to show how past events are connected to the article (written in the present).

Learning Points

The Present Perfect Tense vs. The Simple Past Tense

You use the **Present Perfect** tense to talk about a finished action or event that is connected to the present in some way.

You use the **Simple Past** tense to talk about a finished action or event **not** necessarily connected to the present.

You can use the **Present Perfect** tense to talk about experience.

Present Perfect expresses an action that began in the past and has recently been finished or continues into the present. There is some connection between what happened in the past and now.

For example:

I have learned English = I learned English in the past and now I can speak English.

He has bought a painting = He bought the painting in the past and now he has a painting.

We use **have/has + the past participle** of the verb in Present Perfect sentences.

Verb	Past tense form	Past participle form
go	went	gone
see	saw	seen
become	became	become
promise	promised	promised

Examples:

- *More people have become interested in women's professional soccer.*
- *Women's soccer has been described as the fastest-growing sport on the planet.*
