Learning Points

Stressing New Information

When you want to stress new information, you use different intonation and stress on the “new” word or idea.

You generally stress content words in a sentence.

Content words refer to nouns, verbs, adjectives, adverbs, etc, which are the words that contain the most meaning.

Other words are function words. Function words refer to prepositions, pronouns, auxiliary verbs, conjunctions (like *and* and *but*).

When you want to introduce new information in a conversation, you can choose to put the stress and the intonation on the “new” words. This helps the listener understand that you want to stress that word and that it is important.

Look at this simple conversation:

Tom: I **need** a **pair** of **shoes**.

Jason: What **kind** of shoes? (“kind” is the new information, “shoes” is the old)

Tom: **Dress** shoes.

Jason: Any **color** of dress shoes?

Tom: **Black** dress shoes.

When you stress these “new” words, the pitch of your voice will rise and your voice will be louder. This makes the word stand out more in the sentence.

Learning Points

Linking and Deletion With Superlatives

You use a superlative adjective to express the highest of a quality. You use a superlative adjective to talk about one thing or person in a group of things. You always use *the* with the superlative.

In natural conversation, it is common to link and delete some sounds in the superlative adjective if there is a similar sound in the next word.

For example:

The strangest story.

You delete the 't' sound and link the 's' sound.

The stranges_story.

Sometimes this makes it hard to listen to native speakers talk. If you know the rule, you can listen better.

Practice reading these words aloud:

The smallest sweater = The smalles_sweater

The loudest truck = The loudes_truck
